PROFESSIONAL SUMMARY

Results-driven **Junior Software Engineer** and Information Systems undergraduate at the Federal University of Sergipe (UFS) with hands-on experience designing, building, testing, and maintaining production web applications and RESTful/GraphQL APIs. Strong proficiency in **C#, .NET 8 (ASP.NET Core MVC & Web API), Entity Framework Core, JavaScript, TypeScript, React.js, and Node.js**, combined with solid relational database modeling in **PostgreSQL and MySQL**. Proven track record in **Hexagonal & Clean Architecture, automated unit/E2E testing (MSTest, Moq, Playwright), Code Reviews, Docker, and AI/LLM integrations**. Collaborative team player experienced in agile workflows and distributed remote environments.

TECHNICAL SKILLS

- **Back-End & Architecture:** C#, .NET 8, ASP.NET Core (Web API & MVC), Node.js, Express.js, Java, RESTful APIs, GraphQL, Entity Framework Core, Clean & Hexagonal Architecture (Ports & Adapters), SOLID, OOP.
- **Front-End Development:** React 19, TypeScript, JavaScript (ES6+), Next.js, Vite, Tailwind CSS, HTML5, CSS3, Razor Views, Bootstrap, Leaflet/OpenStreetMap.
- **Databases & Cloud:** PostgreSQL (PostGIS), MySQL, SQLite, Firebase (Firestore, Auth, Hosting), SQL Optimization, Database Migrations, ERD Modeling.
- **Testing, DevOps & Practices:** Unit & Integration Testing (MSTest, Moq, EF Core InMemory), E2E Testing (Playwright), Docker, Docker Compose, CI/CD, Git, GitHub, Pair Programming, Code Reviews.
- **AI Engineering:** Google Gemini API (@google/genai) integration for OCR and workflow automation; AI-assisted development and refactoring (Claude, ChatGPT, Gemini).

PROFESSIONAL EXPERIENCE

Software Engineer Intern (Full Stack .NET & Web) | ItatechJr / DSI - Federal University of Sergipe (UFS)

Aug 2026 – Present | Brazil (Hybrid / Remote)

Full-lifecycle software engineering for BoraLá, an enterprise event and attendance management platform built with C#, .NET 8, ASP.NET Core, and MySQL:

- **Back-End Services & Business Logic:** Engineered domain services in C#/.NET 8 for event registration and attendance tracking, implementing Role-Based Access Control (RBAC) and resolving Entity Framework Core tracking conflicts.
- **Data Security, Privacy (LGPD/GDPR) & Transactions:** Eliminated sensitive PII leaks (CPF/Login exposure in QR codes and badges), implemented transactional concurrency guards to prevent overbooking, and refactored topological cascade deletions in MySQL.
- **Automated Testing & Code Reviews:** Authored unit test suites using MSTest, Moq, and EF Core InMemory covering Controllers and Services; actively conducted peer code reviews on Pull Requests to enforce Clean Code standards.
- **Interactive Front-End Architecture:** Built a real-time badge designer with physical scale Live Preview using modular JavaScript, CSS, Fetch API, and QRCoder.

Freelance Full Stack Web Developer | GobirabaSystem

Mar 2026 – Aug 2026 | Remote

- **End-to-End Web Application:** Designed and delivered an inventory and wholesale/retail sales management system using modular JavaScript (ES Modules), HTML5, and CSS3, automating stock deduction, batch tracking, and financial reporting.

KEY SOFTWARE ENGINEERING PROJECTS

RadarPeças — Geolocation Marketplace & Recommendation Platform — C#, .NET 8 Web API, PostgreSQL + PostGIS, Entity Framework Core, React 19, TypeScript, JWT

Repository: github.com/CassianoMn/RadarPecas

- **Full Stack Architecture:** Built a two-sided marketplace connecting motorcyclists with local repair shops, featuring a .NET 8 REST API, JWT authentication, React 19 + TypeScript SPA, and real-time spatial radius search powered by PostgreSQL/PostGIS.

DesapegAuto (Hexagonal Architecture) & Social Graph APIs (REST vs. GraphQL) — C#, .NET 8, EF Core, Node.js, Express, GraphQL, MSTest, Moq

Repository: github.com/CassianoMn/tees-2026-2-unidade-1

- **Ports & Adapters Refactoring:** Decoupled core business domain from ORM/database infrastructure in .NET 8, achieving **151/151 passing unit tests**. Built a comparative Node.js REST & GraphQL backend with **20/20 passing E2E tests**.

OrganizAE — AI-Powered Financial Management SaaS — React 19, TypeScript, Tailwind CSS, Firebase, Google Gemini 2.0 Flash API

Live App: organizae-a9590.web.app | GitHub: github.com/CassianoMn/OrganizAE

- **AI OCR & Cloud Sync:** Developed a cloud-native financial platform using Google Gemini Vision/OCR to automatically extract items and totals from receipt photos, with automatic model fallback and real-time Firestore sync.

EDUCATION

Bachelor of Science in Information Systems — Federal University of Sergipe (UFS) | Jan 2023 – Dec 2026 (Expected)

LANGUAGES & ADDITIONAL INFORMATION

- **Languages:** Portuguese (Native) | English (Upper-Intermediate / Advanced - B2, proficient in technical communication, code reviews, and global collaboration).
- **Work Mode:** Full-time or Internship | 100% Remote across Americas / Global time zones.
